

# TOURIST GUIDE

ERASMUS PLUS PROJECT - TOGETHER THROUGH TOURISM 2015

## ENVIRONMENTAL

### Natural park of the Albufera

**What's this?**  
It's a park near Valencia that contains the largest lake in Spain and one of the most important wetlands on the Iberian Peninsula. A place of great ecological interest.

**Where is the Albufera?**  
A lot of birds species live in the Albufera Park.

**How is this place?**  
Is a nice and pleasant place. It's peaceful because it isn't crowded, and it isn't noisy but you can listen the birds' sounds. Also it has got shady zones because contains trees and vegetation.

**What can you do there?**  
Here you can enjoy a nice boat ride to see the park, eat paella on board, watch the wonderful sunsets, birdwatching and go fishing.

**Its rich waters have traditionally served as food for fishermen and rice growers and have given rise to a very delicious cuisine.**

## ENVIRONMENTAL DESTINATIONS

*In Spain there are beautiful landscapes from the north to the south but always different, each region has a different colour, smell .....*

*In this guide you can find some information about three different areas which have in common a rich environment, the Albufera in the east, by the Mediterranean, la via verde de la Sierra, in the south and the cabarceno Park in the north.*

# L'ALBUFERA (VALENCIA)

What's this?

It's a park near Valencia that contains the largest lake in Spain and one of the most important wetlands on the Iberian Peninsula. A place of great ecological interest.

## Natural park of the Albufera

How is this place?

Is a nice and pleasant place. It's peaceful because it isn't crowded, and it isn't noisy but you can listen the birds' sounds. Also it has got shady zones because contains trees and vegetation.

Where is the Albufera?

A lot of birds species live in the Albufera Park.

Its rich waters have traditionally served as food for fishermen and rice growers and have given rise to a very delicious cuisine.

What can you do there?

Here you can enjoy a nice boat ride to see the park, eat paella on board, watch the wonderful sunsets, birdwatching and go fishing.

L'ALBUERA is very near Valencia city, this has been a problem for many years as this natural park has been exploited in the wrong way for decades, part of its territory was used to build summer flats and the fauna and flora was partly destroyed, fortunately in the last 30 years a plan has been design to preserve plants, trees, birds and other animals and now nature has recover its power.

## ENVIRONMENTAL DESTINATIONS

# Greenway de la Sierra

Many of the old railways of Spain have been turned into bike routes which run across the most beautiful landscapes of the country. They are called “green ways”.

Via Verde de la Sierra, whose route has never been crossed by any train, runs for 36 km between the towns Cadiz, Puerto Serrano and Olvera.

The environment is a riverbank from Guadalete and natural reserve Peñón from Zoframagón.

The infrastructures are 4 viaducts, 30 tunnels and 5 stations.

The cultural heritage are castles and archeological sites.

**Stations:** - Estación de Coripe  
- Estación de Puerto Serrano.

**Restaurants:** - Bar/Restaurant Mi Pueblo  
Av/ Julián Besteiro nº80

- Bar/Restaurant La Posada  
c/Morón nº5

**Accommodation:** - Hotel Mesón Fuentes del Pino, Jerez- Antequera km. 97

- Hotel vía Verde de Olvera  
(are wagon houses) Antigua estación de tren de Olvera.

- Hotel Sierra y Cal, Avda.  
Nuestra Señora de los remedios, nº2.

## ENVIRONMENTAL DESTINATIONS

### THE ROUTE

- The route starts at the Old station of Olvera with the wagon houses.
- At 3'5km we intersect the track Moron.
- At km 6'5 we find a curious slide to a valley.
- At km 5 are some tunnels, three of which were eventually used by the Greenway.

- The Navalogralla's station, at km 8'70. And then the fourth tunnel is of 700m.

- In the km 15'5 you can see the station of Zafeamagón. In this centre you can learn some things of the vultures, and it has a library. In the centre, the visitors can see some of the nest of the vultures. This observatory has had a lot of success.

- In the km 22 you get into the longest tunnel of the walk, it has 990 m.
- In the km 27 the rivers separate. In this kilometer be a parking and a camping.
- At km 28 the way pass on the river Guadalete. And a tunnel of 500 m.
- At km 30 we can find the first of the four great viaducts of the greenway.
- At km 33'5 we can see multiple number of tunnels.
- The route ends at the ancient station "Puerto Serrano".

# ENVIRONMENTAL DESTINATIONS

## CABARCENO NATURAL PARK (CANTABRIA)

By Paula Camarassa

The Cabarceno Natural Park is located in the town of Cabárceno, in the valley of Pisuerga, belonging to the region of Pas-Miera, 45 kilometers from Santander.

It has 750 acres, and was opened in June 1980.

It is housed in a former mine iron extraction in the open, under a draft environmental restoration, whose network of roads, tunnels and roads have been conditioned for walking and so that vehicles can circulate.

Cabarceno Park is a different zoo where you can find a lot of animals in semi-liberty and is regarded as one of favourite tourist destinations for anyone visiting Cantabria and northern Spain.

It's an alternative and sustainable tourism.

### Animals

- name
- Ostrich
  - hippos
  - giraffe
  - horse
  - hyena
  - lion
  - zebra
  - yak
  - name
  - elephant
